

STRAINER
with poppet - check valve

◀ **Description**

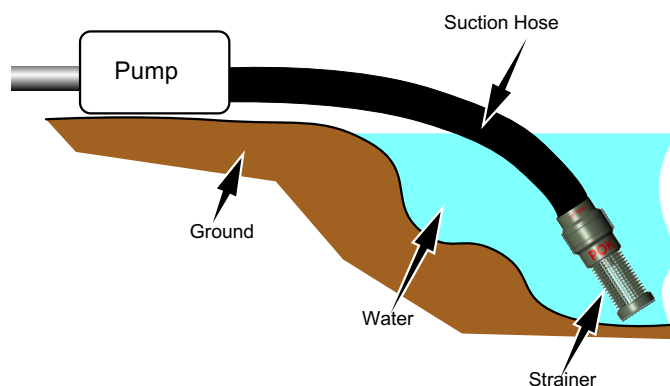

This POK Strainer with poppet is a great tool. It will help prevent re-drafting your inlet water back up to the pump. This will provide a faster pump prime when water is needed. The 1.5" strainer with a poppet check valve is made in stainless steel while the body is made of aluminum with Nituff™ finish that gives 50 microns of PTFE impregnated anodized. An area of aspiration of 3,780 mm² with a filtration capacity of 3.5 mm X 3 mm.
