

LEGENDE AUTOMATIC GALLONAGE

Nozzles in Hardcoat Anodized Aluminum and PTFE

The LEGENDE offers a durable, lightweight automatic gallonage nozzle with the features that you are looking for. Machined out of highgrade aluminum alloy with the trademarked NITUFF™ finish that gives 50 microns of PTFE impregnated anodized unlike the 20 microns of standard anodized.

Features a wide flow range from 10 to 250 GPM at 100 PSI. Newly engineered design totally encapsulates the stainless steel piston valve from the environment. Neither dirt, sand, frozen water or other debris on the inside of the nozzle will prevent you from switching between the multi-position flow settings using the handle.

With a quick half turn of the bumper guard the nozzle will go from full fog to straight stream and flush, all without having to shut down.

The LEGENDE also offers customizing with color-coded pistol grip and type of teeth. Comes standard with a black bumper guard and pistol grip.

All LEGENDES are available in tip only configuration or without pistol grip.

Comes standard with the new bumper guard that features a raised straight line for straight stream and a raised V pattern for fog. These are great features for low visibility conditions. As an option a locking device allow's to get the straight jet only by deliberate action.

Code	Description	W	H	L	Weight	FLOW	
						GPM	LPM
9519	LEGENDE 500 nozzle 1.0" or 1.5" inlet	9.5"	3.3"	10.0"	3.3 lb	10-125	40-475
9403-1	LEGENDE 750 nozzle 1.5" or 2.5" inlet	8.2 "	5.0"	11.0"	6.2 lb	50-250	200-950
9403	LEGENDE 1000 nozzle 2.5" inlet	5.0"	14.0"	15.5"	10.9 lb	50-250	200-950
