## LOW EXPANSION FOAM NOZZLE

## MEDIUM EXPANSION FOAM NOZZLE

## PIERCING TUBE

## FOG TIP NOZZLE

## METERING ORIFICE

This is the perfect accessory for your "**HANDY FOAM**". With comfort and maneuverability in mind, it is designed to carry the 2.5 gal/10L reservoir on your back with relative ease (comes standard on the 5 gallon/20 It unit ). Constructed completely of flame retardant material it features a thick foam back pad, padded adjustable shoulder straps, and adjustable chest and waist straps. Benefits of this low profile harness are easy to see. The waist strap keeps the weight on your lower torso tight against your body keeping it from riding up your back making entering through doors and tight spaces easy. Fatigue from long distance carrying is eliminated. This backpack harness will stay put.

### Back-Pak
